

Water Jacuzzi bunker

Model:

Water Jacuzzi bunker

Material:

Painted or stainless

The Jacuzzi water bunker are used for gentle in load of root crops. The stainless tank contains 34m³. The product is not only soaked, but also washed. The Jacuzzi replace the combination: Bunker, soil separator, and washer, in a way which makes the whole process far more gentle. When the products are taken up along the web-chain elevator, the products has not been in contact with any form of mechanical parts at all. But still the root crops are basically clean. You can place an EKKO Polisher directly after the Jacuzzi.
